

Delta TRV

Vibrating sorting tables Delta TRV 20, 35 and 50

Quality respect through sorting

The principle of the vibrating table is the following :

- . to spread the grapes to make the sorting easier,
- . to separate the free juice from the vegetal fragments (damaged berries, petioles, ...),
- . to supply regularly the reception line (destemmer, pump, crusher, ...).

The grapes are supplied at one end of the vibrating table TRV 35 and goes to the other end thanks to the vibrations. The operators are located on each lateral side of the table.

The Delta TRV includes :

- . draining through removable bar screen
- . sliding juice collecting basin
- . 4 wheels with brake and adjustable brake blocks for a perfect stability.

The TRV is realized in stainless steel for an easy cleaning.

Technical characteristics :

Dimensions :

- . Delta TRV 20 for 4 operators : L 2,00 m x W 1,10 m x H 1,32 m
- . Delta TRV 35 for 6 operators : L 3,50 m x W 0,93 m x H 0,97 m
- . Delta TRV 50 for 8 operators : L 5,00 m x W 0,93 m x H 0,97 m
