

Bucher JLB 5

### Automated basket press Bucher JLB 5

The JLB 5 basket press, with a cage capacity of 5 hectoliters, has been designed and manufactured for oenological purposes and has many unique advantages :

- . The pressing operation is controlled by a PLC with an intuitive operating screen
- . The operator is absolutely free while the pressing is being made (automatic piloting)
- . Automated demoulding of the press-cake (Bucher Vaslin patent)
- . Continuous devatting and pressing (through two pressing cages)
- . A working position H. 2,70 m and a compact handling position H. 1,80 m
- . Hydraulic cylinders located outside of the pressing area.

### Technical characteristics

- . Power : 3 kW
- . Empty weight : 1300 kg
- . Maximum storing of must in the trough : 68 liters.
