Premium Performance Filtration "Graded-Density Cartridge Construction for Longer Life!"

Aqua-Pure Dirt & Rust Cartridges are made from an exclusive process using pure white cellulose fibres. This unique process offers unsurpassed filtration performance.

• Longer Life • Higher Efficiency

As water passes from outer surface into the centre of the cartridge, the filtering pores become increasingly smaller to remove even microscopic particles! Unlike string-wound and pleated paper cartridges, the rigid, sturdy construction of the **Aqua-Pure** cartridges are able to withstand high pressure drop and stressful conditions such as water hammer.

• Rigid construction • Resists water hammer

Note: Cartridges should be replaced every 6 months or sooner when noticeable pressure drop occurs.

Mounting bracket included
