

The Power 12 electronic control box features:  
ON/OFF switch with LED light (B), Dual speed control switch (Elektra only): 1150rpm - 1250rpm (A), Power supply cable at 18m (C), A 12v brushless motor with air cooling system and a total weight of 1100g. The power 12 unit features a power save function which automatically reduces power when the motor is not under load.

The Power 12 Alice & Elektra require the purchase of an 80 amp hour 12 volt battery and charger. The Power 12 battery trolley is included with each complete Alice or Elektra unit purchase. Autonomy: ALICE & ELEKTRA = 1 full working day using an 80Ah 12v battery with a consumption rate of 7 to 8A per hour.

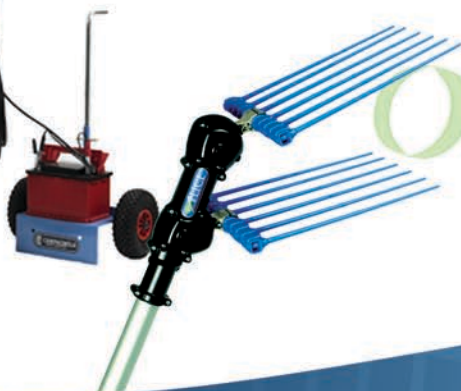

Both the Campagnola Alice & Elektra electromechanical olive harvesters are modular with easily interchangeable parts including fixed and telescopic extension poles.

One size fixed extension available at 170cm => weight 800g.

Two sizes of telescopic poles available at 150cm - 220cm => weight 1145g & 185cm - 270cm => weight 1300g.

**ALICE OLIVE HARVESTER FEATURES:**

- Double rake with dual reciprocating and rotary motion (1150rpm).
- Magnesium, fiberglass and aluminum construction.
- Power save function.
- Weight = 1300g (head unit).

**ELEKTRA OLIVE HARVESTER FEATURES:**

- Double rake with reciprocating motion (1150 - 1250rpm).
- Dual lubrication points.
- Lightweight casing.
- Power save function.
- Weight = 1100g (head unit).
